ABOUT THE DEPARTMENT

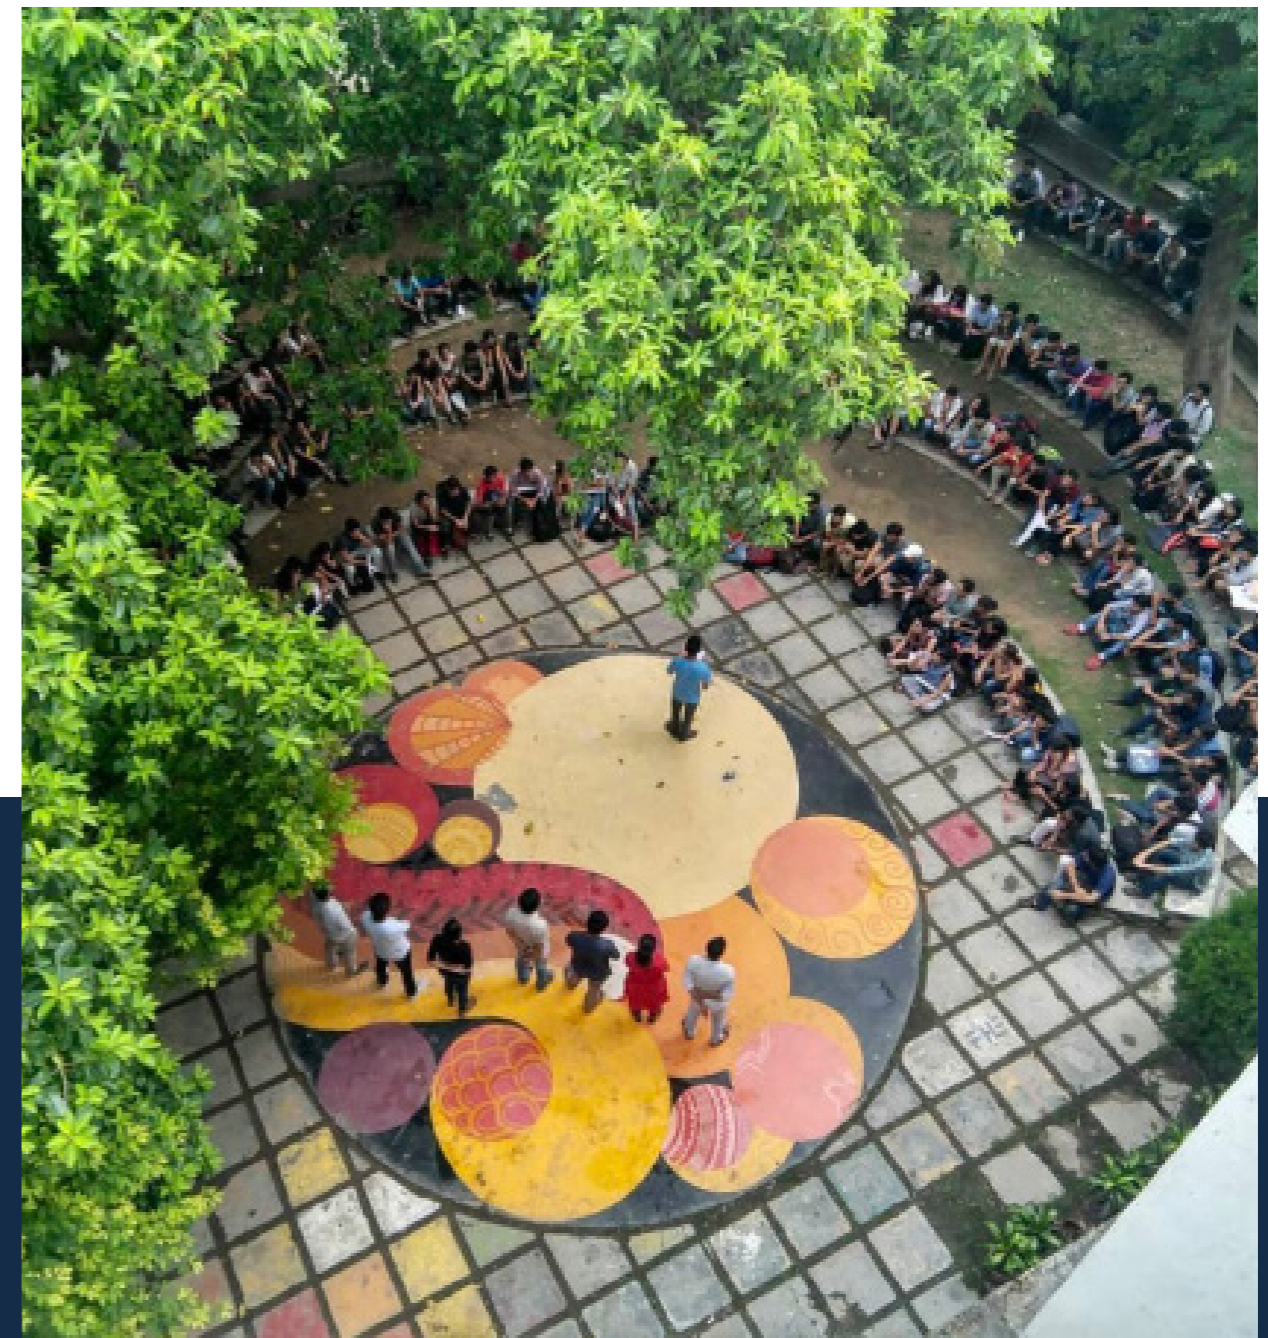

The Department of Building Engineering and Management was founded in August 1979. SPA was the first school to offer a dedicated core course in Construction and Project Management in India.

The course aims at training competent professionals who can deal with complex construction projects by coordinating with various Domain specialists from the concept formation through to design, development and construction stages. The thrust of the course is on imparting knowledge of project management so that projects are completed within the parameters of stipulated time, cost and quality. The course is pursued through participatory method and field exposure of live projects apart from lectures.

ABOUT THE SCHOOL

The School of Planning and Architecture had a modest beginning in 1941 as a Department of Architecture of Delhi Polytechnic. It was later affiliated to the University of Delhi and integrated with the School of Town and Country Planning which was established in 1955 by the Government of India to provide facilities for rural, urban and regional planning. On integration, the School was renamed as School of Planning and Architecture in 1959. Recognizing the specialized nature of the fields in which the School had attained eminence, in 1979, the Government of India, through the then Ministry of Education and Culture, conferred on the School of Planning and Architecture the status of "Deemed to be a University". With this new status, the School had broadened its horizon by introducing new academic and extension programmes and promoting research and consultancy activities. It was recognized as "An Institute of National Importance under an Act of Parliament" in 2015.

Mr. Sushil Kumar Solanki
HEAD OF THE DEPARTMENT
(B.Arch, M.BEM)

From H.O.D's desk

School of Planning and Architecture is one of the premier institutions, reflecting the manifold shades of learning and co-curricular activities. The very motto of our department is to provide quality education and focus on comprehensive coverage of knowledge and skills needed by our students, to face the challenges in life by providing many value added courses to enhance their career prospects.

Over the last 40 years, our students have managed to excel in the industry and this makes the recruiters to offer our students diverse and key roles in the organizations. The batch of 2023 has brought together a mix of academic and industry background. Thus we are confident that our students will emerge as assets not only to this institution and to the organization they belong, but also the country at large.

WHO WE ARE

A young bunch of inquisitive minds, eager to outshine in the real world. Every day, we acquire knowledge to make an impact that matters. We offer a dynamic culture of inclusion, collaboration, and high performance. Every individual has co-functioned with various people from different walks of life. The students are sensitized towards latest trends, methodologies and technologies practiced around the world, which have direct application for Indian Construction Industry.

The academic exposure considers performance in a state-of-art technologically advanced project situations as well as multi-cultural work environments. A class of 34 aspiring project managers is all geared up for taking key responsibilities in the leading companies.

"Good business leaders create a vision, articulate the vision, passionately own the vision, and relentlessly drive it to completion."
 – Jack Welch

BATCH OF 2024

IDEOLOGY

APPROACH

The course was conceived with a vision of galvanizing the ever squabbling siblings Architecture and Construction Management. The curriculum encompasses a diverse array of subjects from the fields of architecture, civil engineering, project management and human resource management. The syllabus is continuously synchronized with emerging trends.

RESEARCH ORIENTED STUDY

MBEM lays emphasis on research projects in the form of two seminars and one final semester thesis, it encourages the students to conduct comprehensive studies related to the subject and its environs through extensive literature and market references, thus widening their scope of knowledge and exposure.

INDUSTRY ORIENTED PEDAGOGY

With the aim of adhering to the lofty standards of the industry, MBEM incorporates guest lectures, workshops and site visits. The department is graced by some of the most respected professionals that the industry has to offer. The summer internship undertaken by students gives them invaluable insight before heading into the industry.

COURSE STRUCTURE

01

- Project Planning & Scheduling
- Construction Technology
- Functional Performance of Buildings
- Building Services
- Quantitative Methods & Operations Research
- Research Methodology

02

- Project Cost and Contract Management
- Structural Systems & Design Process
- Project Seminar
- Infrastructure Development and Management
- Building Energy Modelling
- Fire and Life Safety
- Infrastructure Project Construction Management
- Industrial Training

03

- Project Procurement Management
- Project Finance Management
- Project Seminar
- Human Resource Management
- Environmental Compliances and Management
- Real Estate Management
- Disaster Resilient Project Planning and Reconstruction
- Quality Management System

04

- Thesis
- Quality Management System
