DEPARTMENT OF ENVIRONMENT PLANNING

SCHOOL OF PLANNING AND ARCHITECTURE NEW DELHI

4, Block B, Beside State Bank Of India, Indraprashta Marg, IP Estate, New Delhi, Delhi 110002

PLACEMENT BROCHURE

ABOUT THE SCHOOL

The School of Planning and Architecture had a modest beginning in 1941 as a Department of Architecture of Delhi Polytechnic. It was later affiliated to the University of Delhi and integrated with the School of Town and Country Planning which was established in 1955 by the Government of India to provide facilities for rural, urban and regional planning. On integration, the School was renamed as School of Planning and Architecture in 1959. Recognizing the specialized nature of the fields in which the School had attained eminence, in 1979, the Government of India, through the then Ministry of Education and Culture, conferred on the School of Planning and Architecture the status of "Deemed to be a University". With this new status, the School had broadened its horizon by introducing new academic and extension programmes and promoting research and consultancy activities.

It was recognized as "An Institute of National Importance under an Act of Parliament" in 2015. The School is a specialized University, only one of its kinds, which exclusively provides training at various levels, in different aspects of human habitat and environment. The School has taken lead in introducing academic programmes in specialized fields both at Bachelor's and Master's level, some of which are even today not available elsewhere in India.

Profesor and Head, Department of Environmental Planning

concerns across scales and develop competence towards environment sensitive spatial planning and develop an understanding of linkages between environment, economic, socio-cultural, public- health, livelihood, legal issues and planning intervention. Development of requisite qualitative and quantitative skills in scientific assessment and optimization of resource utilization, with sensitivity towards addressing climate concerns and sustainable development goals in planning process is emphasized in the studio xercises undertaken.

PLACEMENT BROCHURE

ABOUT ENVIRONMENTAL PLANNING

Environmental considerations are assuming an increasingly important role in planning and development of human settlements, owing to the alarming consequences of our various human activities and climate change.

This Environmental Planning equips students in methods for scientific evaluation of various factors for planning environmentally sustainable development of human settlements and regions. Environmental considerations at the planning stage would prevent many of the degradations that result later on.

The main objective of this programme is to impart adequate skills and exposure to the students to enable them to handle the complex challenges of environmental planning, design, impact assessment, and mitigation and preventive measures.

The focus areas of the programme are environmental planning and design, techniques of measurement of water, soil, air and noise pollution, environmental management, environmental impact assessment, auditing and risk assessment, environmental economics, and environmental legislation. In addition, the students are encouraged to undertake training during summer vacations with

environmental agencies and gain professional experience.

Academic Projects.

Semester -1

The first semester in School of Planning and Architecture, New Delhi, is an integrated semester, where students from all planning departments are clubbed together and re-divided into 3 sections namely, A,B and C. Each section, has the same planning exercise, but are given different sites. ODP was the major studio project and for this, students went to 3 different cities in Maharashtra:

Section A : Jalna Section B: Ahmednagar Section C: Parbhani

Main aim of ODP was to visualise the development of a city for the next 20 years and make a plan accordingly, while focusing on all the sections of a masterplan, starting from Regional setting, Demography, Economic Base, to Transport, Environment and Tourism. This was achieved by working

Project 1: Area Appreciation Project 2: Site Planning Project 3: Outline Development Plan

Semester -2 & 3

Second semester onwards, students joined their respective departments.

The Environmental Planning and Design

The third semester studio is more

studio of the second semester was to make an Environmental Improvement Plan with focus on Zero Solid Waste for NCT Delhi. In this semester, students got sensitized to the issues related to solid waste and got exposed to the current practices of waste management. With their understanding of the ground reality, they proposed measures for a better solid waste management, both at City level, in terms of policies and

concept based, wherein, the project is of making an 'Environmental conservation plan with focus on Carrying Capacity, for the ESA of Mount Abu'
