## ABOUT THE **SCHOOL**

School of Planning and Architecture, New Delhi (SPA Delhi) is a higher educational institute located in New Delhi, India, specializing in education and research in the field of Planning and Architecture. It was started in 1941 as the department of Architecture of Delhi Polytechnic (now the Delhi Technological University). In 1959, it was merged with the School of Town and Country Planning (established in 1955), renamed to its current name and affiliated to the University of Delhi in 1979. Later the institute was granted the 'Deemed University' status. Presently it is an "Institute of National Importance" under an Act of Parliament (Ministry of HRD, Govt. of India)

School of Planning and Architecture, New Delhi

## H.O.D'S MESSAGE

---

The Department of Urban Design at SPA, New Delhi, offered the first course of Urban Design in India in 1969. Retaining the legacy of having the best minds in the field as teachers and mentors, the department has continuously evolved for the last 55 years, encompassing emerging ideas.

Our objective has been to impart requisite knowledge and skills to our students to enable them to address the challenges and opportunities presented by cities and urban areas through a holistic design approach. Our curriculum reflects the necessary technical and soft skills that an Urban Designer would apply in their profession. Our program also considers contemporary issues of gender, inclusion, climate change, culture, technological innovation, and people's participation. Our Urban Design Studio is an exciting space for individual and collective learning. Together, the students and faculty devise and demonstrate methods and approaches to transform the public realm and cities. We provide our students with an inclusive and equal-opportunity environment to expand their potential.

The Department's mentorship, knowledge, and industry exposure have provided the country with high-quality and brilliant urban designers. The curriculum allows students to pursue diverse career trajectories, and we have alumni working in UD practices, Academics and Research, NGOs, and in the urban policy arena with Government Agencies, all equipped with the drive and skills to improve our cities.

M.Sc in Development & Planning (Urban Economic Development-UCL, UK)

M.Arch. in Urban Design, B.Arch

# URBAN DESIGN

---

## ABOUT THE COURSE

Contemporary urban design emerged in response to changes to the city through the modern movement in architecture and planning. Urban design takes the responsibility of achieving wholeness of the built environment. This degree program exposes the student to various theories and experiments that architects, planners, social and behavioural scientists apply within the broad historical, social and political context. The program imparts knowledge and skills of design and intervention in the built environment at varying scales through a broad range of subjects, which form the basis to tackle urban design issues.

Bulk of the instruction in this urban design programme is offered through interactive design studios where the dynamics of growth and change in Indian cities are documented and design solutions are prepared. In this programme, inner city renewal as well as growth areas of contemporary cities receive equal attention.

Urban Designers make significant contributions as members of multidisciplinary teams dealing with the formulation and implementation of urban development programs and policies. A large number of employment opportunities exist for the students passing out with the urban design degree.

# THE CURRICULUM

## SEMESTER – 1

### DESIGN STUDIO – I

Introduction to the realm of urban design. Creating an understanding of the role of various physical, social, economic and infrastructural components and decision making processes; the contribution of related disciplines associated with the production of the city.

### URBAN HISTORY AND DEVELOPMENT THEORY – I

Understanding of development theories and the historical circumstances in which they evolved.

### URBAN DESIGN METHODOLOGIES

Structured understanding of the forces that shape and develop cities, and develop a common vocabulary and set of concepts with which to map, analyze, understand and explain the form, structure and development of the city.

### DIGITAL SKILLS FOR URBAN DESIGN

Introduction to relevant computer application such as GIS and other software systems including 3D computation tools for documentation, mapping, analysis and presentation for urban design tasks, site planning etc.

### RESEARCH METHODS

Introduction to the rigour of basic research in the critical analysis and interpretation of urban phenomena and data.

### SITE PLANNING

Development of the skills that enable an urban designer to deal with large sites in a comprehensive manner from ecological considerations to the design of services and related infrastructure.

### URBAN FORM LAB – I

Experimentation and in-depth inquiry into the patterns and processes of urbanism as well as connected production of urban form and space.

## SEMESTER – 2

### DESIGN STUDIO – II

A city scale study under themes - State Aspiration, Ecology, Whose City? Everyday, Shelter, and Livelihood.

### PLANNING THE CITY – I

Exposure to the principles of planning and critically evaluate different planning processes prevalent in India and abroad.

### URBAN HISTORY AND DEVELOPMENT THEORY – II

Tracing the historical path of urbanization as a process and examine the spatial correspondence between urban patterns through space and time and connected development paradigms.

### PARTICIPATORY PLANNING AND CO-DESIGN TOOLS

From top down to bottom up, understanding the methodologies and approaches adopted in contemporary India and examples from abroad to unravel the participatory process.

### URBAN POLICY AND MANAGEMENT FRAMEWORK

Understanding urban issues revolving around two important sectors of urban development - Environment and Heritage.

### DEPARTMENTAL ELECTIVE

#### I: Imagining Cities

Explore the representation of city narratives through diverse literary forms - prose, poetry, script, etc. from selected writings across the world, including Indian/Asian works.

#### II: Urban Infrastructure and Housing

Understand urban issues that signify everyday urban conditions with particular emphasis on Indian urban centres and connected policy-management frameworks.

### URBAN FORM LAB-II

Experimentation and in-depth inquiry into the patterns and processes of urbanism as well as connected production of urban form and space

## SEMESTER – 3

### DESIGN STUDIO – III

Inner city regeneration by examining issues related to critical programme development, urban conservation, economic and environmental considerations, and infrastructure development, social and political forces. Participatory methods i.e. involvement of stakeholders is key.

### PLANNING THE CITY – II

Understanding urban governance structures as well as legislative and administrative frameworks with specific reference to different classes of cities in India.

### THESIS METHODOLOGIES

Learning methodological and management tools to undertake an individual, self-driven design/research exploration on a thesis as assimilation of the learning process in the urban design program.

### READING THE CITY – Lecture

Understanding the role playing, nature and phenomenon of urbanism in Indian cities.

### READING THE CITY – Seminar

Understanding the notions of a city, urban society and culture, politics of globalisation & liberalisation in a post colonial city through selected readings. The subject also explored contemporary trends, conflicts and contestation in 5 Indian cities.

### DEVELOPMENT PRACTICE, PROJECT PLANNING & FINANCE

Introduction to the project planning and finance, its importance and its role in management and execution.

### URBAN FORM LAB – III

Experimentation and in-depth inquiry into the patterns and processes of urbanism as well as connected production of urban form and space

## SEMESTER – 4

### THESIS BY DESIGN AND RESEARCH

An independent design on a topic defined by the student, leading to the development of a clear design proposal to be supervised by a faculty team & evaluated by an external jury.

### DEPARTMENTAL ELECTIVE

#### I: Future Cities

The objective of the course is to examine contemporary concerns and merging theories in the construct of the city, recent urban initiatives, sustainable development, smart growth, ecosystem approach, urban regeneration etc. It critically reviews philosophies, visions and projections made in contemporary literature, film, digital media, etc. through urban design, architecture and planning projects and the views of social and political scientists, economists etc. for the future of urbanism and city dynamics.

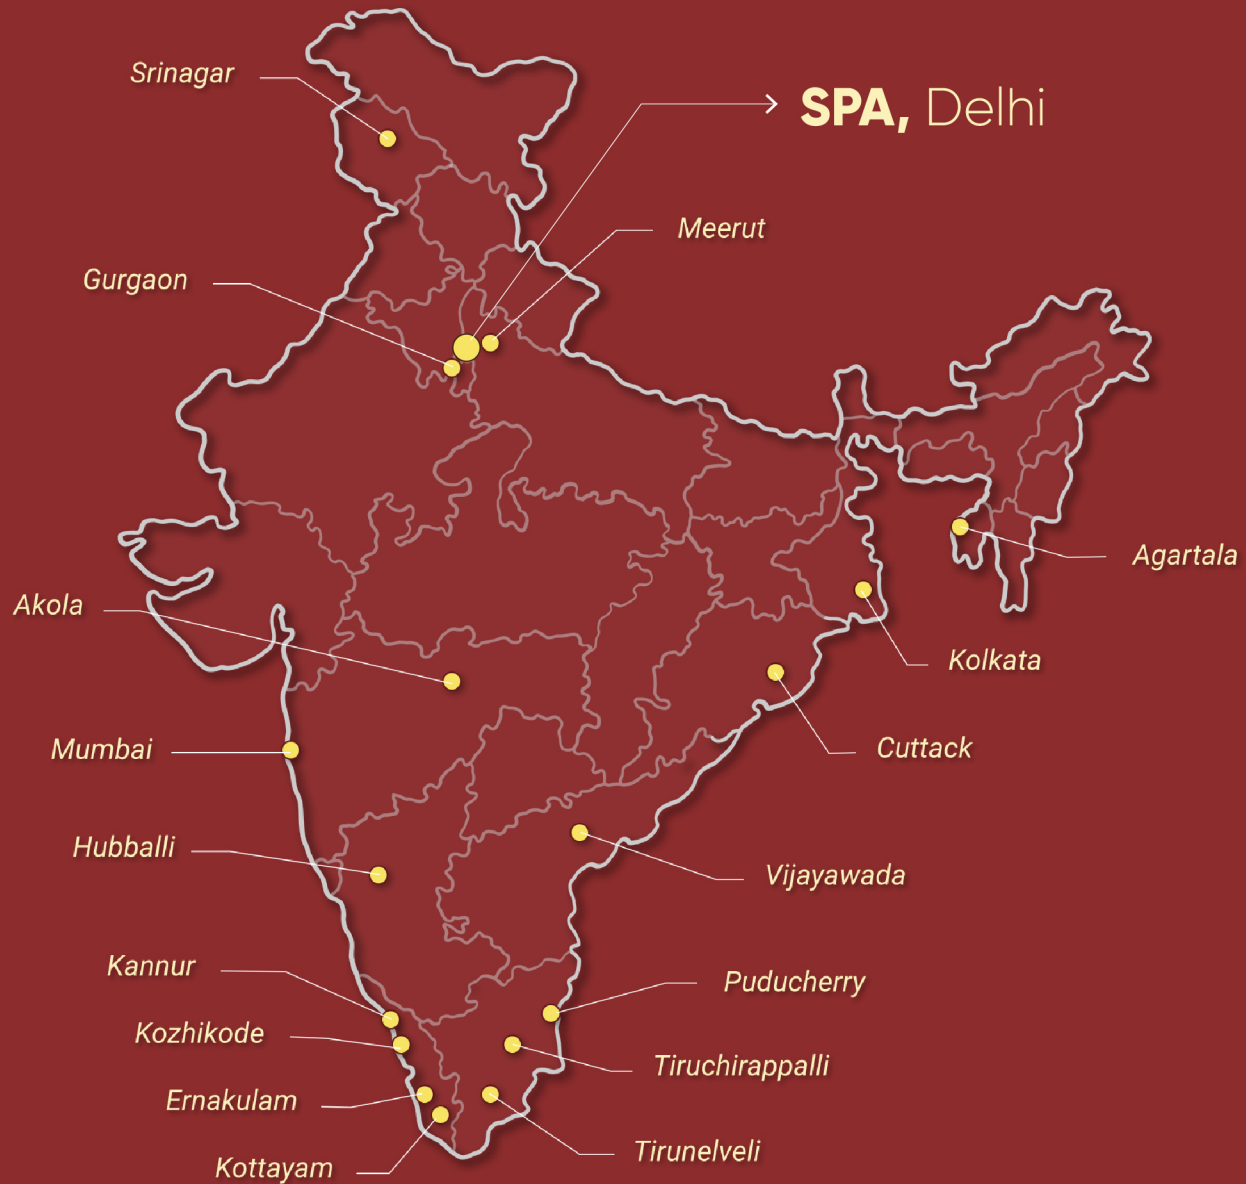

#### II: Design Anthropology

People - space - phenomenon. Study of human beings in particular setting namely, cultural anthropology, biological anthropology, linguistic anthropology, archeological anthropology. understanding society and culture, characteristics, attributes, social identity.

### URBAN FORM LAB – IV

Experimentation and in-depth inquiry into the patterns and processes of urbanism with the future as a catalyst and as connected production of urban form and space.

# MUD BATCH 2022 - 24

## DESIGN STUDIO OVERVIEW

### About the Studio

The Studio is our introduction to the whole process of reading, understanding, analyzing, and decision-making for the larger impact on the city. The objective is to expose us to the complexities of the design process. To create an understanding of the role of various physical, social, economic, and infrastructural components; and the contribution of related disciplines associated with the production of the city. The site of the study was four different sites along the Najafgarh, from Delhi. It gave us the opportunity to understand the different groups of people living in a diverse domain. How to understand the potential and the issues of the site and then give design-based solutions for it.

The studio is more focused on five themes: State Aspiration, Ecology, Whose City? Everyday, Shelter, and Livelihood. We studied the city of Jodhpur based on these five themes. It familiarized us with urban design terminologies, methods of surveys, strategies for community discussions, and the process of site analysis. We are one step ahead of where we started, prioritizing the issues and understanding the major study area. We started giving design solutions based on the above five themes.

- I. **Delhi Flows**  
4 Sites along Najafgarh drain
- II. **City Studio**  
5 themes - 5 Wedges of Jodhpur
- III. **Participatory Planning**  
3 Local Areas along Najafgarh drain
- IV. **Thesis**

# STUDIO OVERVIEW

## SEMESTER - 01

The first semester studio, under the broader topic "Delhi Flows", was aimed to understand the morphological and spatial character of different types of settlement along the Najafgarh drain. The historical development of settlements, their relationship with the waterbody and their nature of functioning as a part of the city was studied.

In Detailed documentation, aspects like morphological analysis, functional character analysis, activity patterns led to the understanding of how the site functioned. While from the study of societal and community networks were derived the behavioural patterns within the site.

The last part of the studio involved identification and prioritization of specific issues, preparing a structure plan and propose urban design interventions.

# 04 SITES

## Spatial Study - East Av. Market, Punjabi Bagh

## Design Intervention

## Structure Plan

## Morphological Study - Ashok Vihar

Figure Ground Plan

Built-use Distribution

Street Section

Street Elevation

## Morphological Study - GTB Nagar

Figure Ground Plan

Built-height Distribution

Built-use Distribution

Open Space Structure

### Legend

- Strengthening NMW Routes
- Shared Streets and Pedestrian Linkages
- Junctions Re-design
- Proposed Motor Road Connection
- Across Site Connection
- Vehicular Connectivity
- Potential Centers for Social Infrastructure
- Designated parkings
- NMW Bays

# STUDIO OVERVIEW

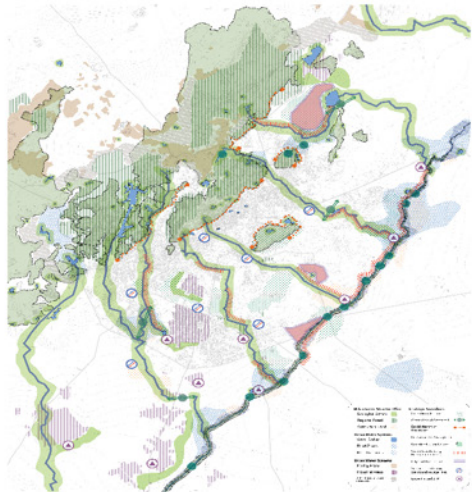

## SEMESTER - 02

The studio's objective in the second semester is to expose students to city-level development processes, hone their skills to understand overlapping factors of transformations, and attempt a design proposal to address these processes in the emerging peripheries of the selected city

In the thematic stage of the Studio, the student teams conduct a thematic study of selected dimensions of the contemporary urban scenario of the selected city and its adjoining areas, concentrating primarily on recent development and future proposals for the region. In the next stage, one specific theme from the above studies is selected for each city and the common theme of 'Everyday City.' Students conduct detailed studies and analyses of these two themes for a portion of the city.

# JODHPUR CITY

Structure Plan  
Environmental Interface

Economic Grouping Map

Design Proposal for Shilpagram

Design Proposals for Basni Industrial Area

# MEET THE BATCH

## 2022 - 24

We are a batch of 21 professionals, expanding our knowledge into the realm of urban design. We hail from 17 different cities which proved to be advantageous for us in engaging in peer learning and appreciating diversity of culture and language. Every individual holds a unique character and expression. As a batch, we are trained to be critical thinkers, adapt to various environments, and overcome challenges by understanding the various dynamics of architecture and urban design. We believe that designers should possess a social responsibility to bring about change in urban life.

# A WORD FROM OUR FACULTIES

“The Urban Design Program in SPA-Delhi prepares students to specifically address complex issues that characterize our cities through a rigorous, reality driven, outcome-oriented curriculum over two years. Urban designers from this department have been involved in leadership positions in both the private and public sector, international organizations, academia and research. Equipped with observational, analytical, creative, representation and management tool. The Urban Design Program in SPA-Delhi prepares students to specifically address complex issues that characterize our cities through a rigorous, reality driven, outcome-oriented curriculum over two years.”

## **Prof. Dr. Arunava Dasgupta**

B.Arch, M. Arch (Urban Design)  
Ph.D, FIUDI

“I have been teaching this course as a visiting faculty for close to four decades now. In all these years I have seen the curriculum constantly evolving to suit the changing development scenario, at the same time keeping the stress on the core design aspects intact. The graduates of this course are strong in their design and presentation abilities and are sensitive towards environment and community aspirations. They are aware of various implementation techniques and strategies for complex urban development projects including various funding sources like Govt. Missions etc and are trained to participate in them.”

## **Ujan Ghosh**

M.Arch. & Masters in City Planning (University of Pennsylvania)

“The urban design program at SPA provides a unique and comprehensive platform to learn about complex urban conditions and issues. Critical theory is combined with in-depth real-world understanding. Best practices in analysis and design thinking are taught to allow the students to become responsible, creative and pragmatic professionals”

## **Rajiv Bhakat**

M. Arch. (University of Pennsylvania)

“Masters in Urban Design at SPA provides students a unique opportunity to understand the complexity of Indian cities, layering concerns of social issues, built and natural heritage as well as contemporary needs helping them in honing relevant skills for application in the real world”

## **Aishwarya Tipnis**

M.Sc European Urban Conservation (University of Dundee, Scotland)

“The Urban Design Programme at SPA equips students to understand, appreciate and address complex urban realities of our cities with technical rigour, passion, and a belief in the ability of design to enable positive urban transformation.”

## **Mriganka Saxena**

Master in City Design and Social Science (London School of Economics)

“The program offers an exposure to interdisciplinary faculty group along with close understanding of emerging urban design issues including climate change, design resilience, social issues and urban development, representation of stakeholders to the design process.”

## **Nishant Lall**

M.Arch. (University of California)

# A WORD FROM OUR FACULTIES

“The UD programme prepares its students to confront the reality of our evolving urbanscape with a wide set of dynamic tools. The department provides an immersive environment in the form of theory lectures and studio projects. The latter range from live community projects to large scale interventions with multiple stakeholders all the while encouraging graduates to be imaginative as well as socially responsible, to be thinkers and doers.”

## Kanu Kartik Agrawal

Master of Environment Design (Yale University)  
M.S.Arch (University of Cincinnati, Ohio)

“By imparting a holistic interdisciplinary perspective on contemporary concerns as well as historical exigencies, the Urban Design program at SPA Delhi, fosters students to be relevant, critical, reflective and innovative in their design skills”

## Rinki Sarkar

PhD (Delhi School of Economics)

“The Urban Design Programme is a multidisciplinary, collaborative and innovative space for both students and teachers alike. Through the process of knowledge exchange on theoretical thinking and design explorations, students are trained to look at complex urban issues from multiple perspectives. They are encouraged to arrive at unique design solutions which are socially responsive, yet challenge the status quo of our urban environments. Our graduates are equipped to provide transformative solutions for not only the present but also the future of our cities.”
